3. So many books and literature
about philosophy and mystics,
Try to reveal it more and more,

concerning science and the nature,
micro- , macro-cosmos, and physics.
there`s still so much, I can explore.

Refr.: I`m impressed by revelations
pointing to God`s great creations,
fascinating all his productions,
his remarkable constructions.
But I know, that I`m still blind.
I cannot find rest in my mind.
