

# QUESTIONS

Prelude: H – Fis4 – E – H – E – Fis - H

1. **H**                    **Fis**                    **E**                    **H**  
Thousands of Questions are still waiting  
**E**                    **cis**                    **Fis**                    **E**  
All my searching and contemplating  
**E**                    **Fis H**                    **E**  
What`s the universe`s function?  
**E**                    **Fis**                    **gis**                    **Cis**  
What keeps the world and men in junction?

**E**                    **H**                    **cis**                    **Fis**  
for an answer, I can`t find.  
**H**                    **H4 H**                    **cis**                    **Fis**  
leads to confusion in my mind.  
**H**                    **H2 H**                    **E**                    **Fis**  
What`s the meaning of it`s all?  
**H**                    **Fis**                    **gis E**                    **Fis H**  
What`s the meaning of rise and fall?

2. How do plants feel autumn`s beginning  
Who controls electron`s spinning,  
Who gives us the air to breath and  
of the sunrise which can please and

when they discard all their leaves?  
grants the affection we receive?  
what`s the cause of earthquakes, storm  
of the sunlight, bright and warm?

3. Why can we explore and admire  
What`s the source of love, desire?  
Why salt water in abundance  
Why do people yearn for independence

all the marvels here on earth.  
Why is there death and pain at birth?  
even though fresh water constantly flows?  
why do they tremble, when a cold wind blows.

Interlude: H – E – Fis – gis – E – H – Fis – H

4. There are a lot of troublesome questions,  
Wisdom has yet unknown bastions,  
We have mind, the ability for reflection,  
We can feel love and affection,

but people rarely show interest.  
that require mental quest.  
to gain knowledge and to grow.  
and recognize feelings we show.
