

THE KITCHEN

1. Nearly no one knows the people sweating
In the kitchen, while we are eating,
to satisfy the hunger, to enchant the taste,
embellishing our day with dishes,
with compositions, manifold, delicious,
while we forget the workday troubles and haste.

2. Every evening in the kitchen they worry
to complete the meal, always in hurry,
refining potatoes , noodles and the rice.
They sweat in front of their necessary ranges
conforming to our wishes, changes,
while we often use to grumble at the price.

What should present a single potato,
how ordinary a tomato,
if not top tapped by the head cook`s hand?
The creator of the bell cuisine
coddling us with sweets and creams
pays attention to each new wave and trend.

4. What`s about the roast beef, stewed steak,
how would taste the green, the pan cake,
if not ennobled by the cook?
What means the joint without the gravy,
how ordinary buffets may be,
if no one has for delicacy a look.

And when we finished our meal,
they put their shoulders to the wheel
to clean the heath, the dishes and the pans.
They wipe of the fat and stains,
remove all vessels, food remains
craving for the rest, when a long day ends.

5. Yes, we enjoy the palates pleasures
by culinary art with natures treasures,
seldom losing thoughts about the crew,
which never is shy of time and strain,
is thankful for the tip they obtain,
needs praise for work like me and you.
