

LIFE

Prelude: D - G D A - D - A

1. Everything that stirs, dispels or collects
everything that repels or attracts,
that cools down or generates warmth
- everything that moves, vibrates, reflects,
that can come loose or that connects,
is an expression of life in all its forms.
2. Every tiny particle shows movement,
Development strives for improvement,
There`s a permanent flow in creation.
- even if it cannot be seen.
constantly changing the current scene.
There`s no real standstill in any situation.

Interlude: D - A - G - D - G A - h - G A - Fis - G - D - G A - D - A

3. Nothing on earth will last forever,
The decay doesn`t know the word "never!"
Life in every shape and form
- everything will fall one day.
Only time sets the pace of the play.
will dissolve, that is the norm.

Afterlude: D - A - G - D - G A - h - G A - Fis - G - D - G A - D - D
