

SEE THE MIRACLE OF LIFE

Prelude: A - A - D - D - A - ED - A - A

1. See the miracle of life manifesting in many forms.

It knows no boundaries, it knows no norms,

it is spreading steadily.

In the sky as on earth, in secret or in light,

in water or on dry land, colored or black, white,

it multiplies incessantly.

2. We are always discovering new creatures.

new plants that grow and slowly mature,
so many areas still unexplored.

See the ugliness, see the beauty!

Isn't mankind's task and duty
to preserve the environment, not to ignore.

Bridge: As in the big, so in the small,
whatever hops, sqirms, climbs or crawls,
whatever runs, sneaks, swims or flies,
whatever may live long, whatever suddenly dies,
Everything alive here on earth,
the inspiring beauty we can see
has its meaning and its worth,
show GOD's magnificence, his ingenuity.

Interlude: A - A - D - D - A - ED - A - A

3. Look at the world of tiny bacteria,
they didn't get eyes, yet they find their area.
And no one tells them what to do.
Just the number of insects populating the globe,
which research can hardly cope,
is unimaginable for me and you.

Afterlude: A - DE - A
