

HOLD OUT

Prelude: a - C G - a - C G - a - C G - e - e - G - G

1. Even if sometimes you cannot understand your fate,
hold out, don't give up, the abandonment can wait.
If the situation is severe and too difficult to survey,
hold out and keep courage. Not every day will be grey.
2. Hold out when storms are raging and tough winds blow in your face.
Stay calm. There's always hope, there are always different ways.
If you feel, you're at the end and you can't see the tail-light,
Hold out and you will see: with every day will end the night.

Interlude: a - C G - a - C G - a - C G - e - F G

3. Hold out even if the condition seems hopeless, ill at ease,
if doubts gradually come and despair will increase,
if all the wheels you have to move just slowly turn around,
then hold out and remember until now solutions you've always found.
4. Hold out, be confident, if hurdles block up your way,
and neglect all the evil words your adversaries will say.
With confidence and courage you can overcome the worst.
Don't let yourself be directed, for yourself you are the first.
