

WHAT ELSE HAS TO HAPPEN I

Prelude: C - C - F - G - C - F - C - C

Refrain:

What else has to happen before we finally get it? If we continue like this, we will surely regret it.

Nature does not need us, but we absolutely need nature.

We can already see the abyss, but the insight doesn't want to mature

1. that we cannot carry on as before,
because we are destroying our livelihood more and more.

We act as if nothing needs to change further on
and sink into apathy, complacency has won.

2. Despite the destruction of the basis of life, we carry on.
The extinction of biodiversity has long since begun.
Go out into nature, where are the flowers, where is their scent?
The collapse of the entire ecosystem could be imminent!

Refrain:

What else has to happen before we finally get it? If we continue like this, we will surely regret it.
Look at the soil, the rivers and seas, there's plastic waste everywhere,
Smog, soot and fine dust pollute the air.

Bridge:

I think no one is able to excuse how we think and act.
Why don't we care, the end is near, that's a fact.
We are blind, we have lost reason and insight,
belief in prosperity and self-interests are still in the spotlight.

3. Why do we act this way and cannot find the best
What about our children? Can we still sleep and rest?
We leave them a destroyed and devastated place,
because the exploitation of this planet will leave its trace.

4. We are close to the abyss that experts are warning about all the time.
Nature conservation must come first, ignoring it's almost a crime.
Insight and joint action are essential if we want to save our earth.
Don't let it be destroyed, nature is so beautiful,
much more valuable than the purse.
